

FOR PATIENTS & FAMILIES

Wound care without the workaround

No more rearranging your day around someone else's schedule. Care comes to you.

— No more sitting in traffic.

Skip the drive, the parking, and the strain of getting to a clinic. Your provider comes to you.

— No more waiting rooms.

Stay comfortable at home instead of spending your day waiting to be seen.

— Heal in familiar surroundings.

Your couch. Your bed. Your surroundings. Care happens where you feel at ease.

— Your family stays in the loop.

Loved ones can be present, hear updates firsthand, and ask questions directly.

— Scheduling around your life.

Appointments are coordinated around patient needs and provider availability.

FOR CARE FACILITIES

Wound care coordination, off your plate.

Your staff has enough to manage. Let us handle scheduling, follow-ups, and the loose ends.

— Scheduling is handled for you.

Visits are coordinated with the patient, so your team can focus on the people in front of them.

— Smoother discharge planning.

Wound care follow-ups can be coordinated before the patient leaves your facility.

— Free up your clinical staff.

Offload outpatient visit coordination and give your team more time for in-house patients.

— Support continuity of care.

Consistent follow-up coordination helps bridge the transition from facility to home.

— A resource for your facility.

MWCS connects patients with independent, licensed providers who handle the visits.

MEDICARE PART B SUPPORT

Eligibility is confirmed before the first visit is ever scheduled. No surprise billing, no coverage issues downstream.

TYPES OF WOUNDS COORDINATED

One platform, every wound type.

Connect with an independent, licensed provider for your specific wound care needs.
